

Paramaethu Cymru: Research and Decision-Making Structure Proposal: *Time constraints mean that much of the work will still need to be done on a voluntary basis, e.g. by working parties – e.g. one for each specific focus (such as low cost PDC courses; Welsh LAND project; ...), set up by the satellite groups to research opportunities, ideas, expertise, and make proposals to put forward via the satellite group to the central circle.*

The Central Circle comprises 1 rep from each satellite group and has a decision-making role. (That could be done via referenda of all Welsh members using Survey Monkey before making a final decision of implementation).

The diagram attempts to show that process, adapting the 6 satellites proposed at the 2015 Gathering, to take account of the network Coordinator role, the developing emergence of regional groupings and discussions since the last Gathering.
